LIST OF CONTENTS

Number 1

Zoran Djuric, Branko Livada, Vesna Jovic, Miloljub Smiljanic, Milan Matic and Zarko Lazic	1	Quantum efficiency and responsivity of InSb photodiodes utilizing the Moss–Burstein effect
I. Ursu, M. Stoica, I. N. Mihăilescu and D. Crăciun	9	Pulsed 10 μm-laser interferometry of the early evolution stages of a laser-generated breakdown plasma in air in front of an aluminium target
N. N. Winogradoff	21	Optical characterization of radiative semiconductors
T. Ohba and S.-I. Ikawa	27	Resolution in the far-infrared Fourier transform spectroscopy with a pulsed synchrotron source
A. Rogalski and K. Jóźwikowski	35	Intrinsic carrier concentration and effective masses in $InAs_{1-x}Sb_x$
Gail J. Brown and John A. Baker	43	Photoresponse of ion implanted gallium dopants in silicon
G. Moruzzi, F. Strumia, P. Carnesecchi, B. Carli and M. Carlotti	47	High resolution spectrum of CH_3OH between 8 and 100 cm^{-1}
K. H. Michaelian	87	Interferogram symmetrization and multiplicative phase correction of rapid-scan and step-scan photoacoustic FT-IR data
H. Schopf, W. Ruppel and P. Würfel	101	A 16-element linear pyroelectric array with $NaNO_2$ thin films
A. P. Davis and A. M. White	107	Incorporation of surface effects in three-dimensional modelling of complex photo-detector arrays by spot-scan simulation
P. Calisse, P. de Bernardis and S. Masi	113	A 3-field differential photometer for far infrared anisotropy measurements
J. Zmuidzinas, A. L. Betz and R. T. Boreiko	119	A corner-reflector mixer mount for far infrared wavelengths
Marie Papini	133	Study of the relationships between materials and their radiative properties: application to natural fibers for the spectral wavelengths range 0.25–2.5 μm
K. Sakai, Y. Kato, T. Fukushima, Y. Konishi, Y. Ichioka and N. Suzuki	139	Stabilization of a CO_2 laser by means of a two-beam interferometer
J. E. Eldridge and C. C. Homes	143	Low-temperature, small-sample reflectivity measurements in a commercial rapid-scan Michelson interferometer
A. Maciak, J. Piotrowski and A. Rogalski	149	Auger-limited carrier lifetime in HgZnTe ambient temperature 10.6 μm photoresistors
V. K. Malyutenko, V. A. Botte and V. I. Chernyakhovsky	155	Infrared emission of free carriers in semiconductors below the fundamental absorption edge
Research Note **D. A. Naylor and I. Furniss**	159	A method of determining the flatness of metal mesh elements of a far infrared Fabry–Perot interferometer
Book Review	163	

Number 2–4

FOURTH INTERNATIONAL CONFERENCE ON INFRARED PHYSICS (CIRP 4)

Fritz K. Kneubühl ix Foreword

I. ASTRO-PHYSICS AND RADIATION STUDIES

Ia. Astro-physics

M. J. Mumma 167 Probing solar system objects at infrared wavelengths

T. J. Lee, I. S. McLean and R. Wade 175 A camera for infrared astronomy and its performance on the 3.8 M UKIR telescope

D. A. Naylor, I. Furniss, W. M. Glencross and W. A. Towlson 185 Laboratory evaluation of the Fabry–Perot interferometers for the long wavelength spectrometer of the Infrared Space Observatory

R. S. Yalamanchi, M. N. Annapurna, C. L. Nagendra and G. K. M. Thutupalli 191 Design and development of far infrared (FIR) filters for space applications

C. L. Nagendra, S. Mohan and G. K. M. Thutupalli 195 High efficiency infrared antireflection coatings (ARCs) for space optics

Theodor Kostiuk, Fred Espenak, Michael J. Mumma and Paul Romani 199 Infrared studies of hydrocarbons on Jupiter

Ib. Thermal Emission and Remote Sensing

Li Shichun, Lu Fei and Shao Xiu'e 205 The optimum efficiency of production of radiation—a new relation for black body radiation

V. Tank 209 A spectroscopic blackbody radiance calibration procedure with inherent source temperature calibration

V. Tank 211 Infrared temperature measurement with automatic correction of the influence of emissivity

R. E. Avalyan, G. S. Gevorkyan, A. A. Glushko and K. B. Petrosyan 213 Powerful Nd:YAG laser for remote sensing

Ic. Building Studies

F. D. Heidt and H. J. Streppel 215 Radiative and convective heat exchange inside a test box with solar gain

T. Łakomy 227 Thermal radiation field of low-temperature sources

H. Nowak 231 The sky temperature in net radiant heat loss calculations from low-sloped roofs

II. DETECTORS AND COMPONENTS

IIa. Detectors

D. Engemann, R. Faymonville, R. Felten, O. Frenzl, K. Meyer, A. Sohn, B. Dierickx and J. Vermeiren 235 Infrared detector arrays with multiplexing cryogenic readout electronics for ISOPHOT

V. M. Arutyunyan, F. V. Gasparyan and S. V. Melkonyan 243 Theory of $1/f$ noise in medium and far infrared photodetectors

M. Grudzien and J. Piotrowski 251 Monolithic optically immersed HgCdTe IR detectors

N. Hiromoto, T. Itabe, T. Aruga, H. Okuda, H. Matsuhara, H. Shibai, T. Nakagawa and M. Saito 255 Stressed Ge:Ga photoconductor with a compact and stable stressing assembly

Li Chi and Huang Xingliang 261 The theoretical calculation of the phase diagram of infrared detector materials (Hg, Zn)Te and (Cd, Zn)Te

J. Piotrowski, K. Adamiec and A. Maciak 267 High-temperature 10.6 μm HgZnTe photodetectors

F. F. Sizov, V. V. Tetyorkin, Yu. G. Troyan and V. Yu. Chopick — 271 — Properties of the Schottky barriers on compensated PbTe⟨Ga⟩

C. Hartung and J. Müller — 279 — Sensitive detection of infrared radiation, the optothermal detector and its application

IIb. Devices and Components

S. G. Lukishova and L. V. Chernysheva — 285 — Apodized apertures for IR lasers

I. Nazarenco, M. Popescu, R. Medianu and R. Câmpeanu — 291 — Interference filter for 2.5–5 μm wavelength range

N. Hirose, S. Yoshimori and M. Kawamura — 293 — Josephson triode and its characteristics

E. M. Dianov, V. G. Plotnichenko, G. G. Devyatykh, M. F. Churbanov and I. V. Scripachev — 303 — Middle-infrared chalcogenide glass fibers with losses lower than 100 dB km^{-1}

J. Jiao, W. L. Kath, X. Fang and M. E. Marhic — 309 — Losses of infrared biconcave metallic whispering-gallery waveguides

III. LASERS

IIIa. Gas Lasers

T. Q. Wu, V. Schröder, F. I. Saad, W. Klische and C. O. Weiss — 325 — Lorenz-type chaotic pulsing of a $^{15}NH_3$-laser

S. Okajima, K. Kawahata, T. Aoki, D. G. Bi, S. Kubo and J. Fujita — 331 — Suppression of laser noise in cw 337 μm HCN lasers

V. V. Churakov, V. A. Gorobets and V. O. Petukhov — 339 — Effective oscillation of a cw CO_2 laser in the range of 11 μm (01^1 I–11^1 0 band)

H. Cao, H. Wang, Y. Chen, M. Che and X. Hu — 343 — Single frequency TE CO_2 lasers with a simple structure

V. Yu Ananiev, V. A. Danilychev, A. A. Ionin, A. A. Kotkov, A. P. Lytkin and D. V. Sinitsyn — 347 — Pulsed electroionization carbon monoxide laser amplifiers

M. S. Trtica and S. V. Ribnikar — 351 — The operation of the TEA CO_2 laser with nonconventional CO_2/H_2 gas mixture

C. Gastaud, M. Redon and M. Fourrier — 353 — New CW FIR laser actions and assignments in CD_3CN and CD_3Br

IIIb. Semiconductor and Solid State Lasers

K. Unterrainer, M. Nithisoontorn, M. Helm, E. Gornik and E. E. Haller — 357 — Single mode operation of the p–Ge FIR laser

S. Kuroda and S. Komiyama — 361 — Far-infrared laser oscillation in *p*-type Ge: remarkably improved operation under uniaxial stress

Takeshi Morimoto and Meiro Chiba — 371 — Infrared emission and lasing due to magnetoelectric-photo effect in InSb: spectroscopy

V. J. Stefanov — 381 — Laser with two-phase active medium

N. L. Rowell and D. J. Lockwood — 385 — Near infrared magneto-absorption in the laser material $KZn_{1-x}Co_xF_3$

IV. LASER INTERACTIONS AND SPECTROSCOPY

IVa. Laser Interactions with Materials

C. Liedenbaum, S. Stolte and J. Reuss — 397 — Multiphoton excitation of molecules by single mode cw lasers

G. Krüger and G. Dodel 411 Far-infrared frequency shifting by optically induced gratings in semiconductors

V. Kozhukharov, D. Dimitrov and D. Tonchev 415 Interaction of CO_2 laser radiation with glasses

L. Nánai, I. Hevesi, V. A. Bobyrev, F. V. Bunkin, B. S. Luk'Yanchuk, D. T. Alimov, S. A. Ubaydullaev and P. H. Habybullayev 423 Dissipative structures and spiral waves at laser light induced oxidation of metals

N. A. Kirichenko, E. A. Morozova, A. V. Simakhin and L. Nánai 427 Peculiarities of cw-CO_2 and YAG laser ignition of metals in air

R. E. Imhof, C. J. Whitters and D. J. S. Birch 433 Infrared spectral analysis of opto-thermal transients from liquid crystals

IVb. Laser Spectroscopy and Chemistry

Martin Quack 441 Infrared laser chemistry and the dynamics of molecular multiphoton excitation

T. Ristoiu, C. Ungureanu and M. Chirtoc 467 The frequency, fluence and pressure dependence of the absorption of pulsed CO_2-laser radiation by CF_2HCl

R. Bruzzese, C. D'Ambrosio, C. de Lisio, S. Solimeno and V. Tosa 473 Analysis of V–V, T relaxation times in CO_2 laser excited $CHClF_2$ molecules

C. D'Ambrosio, W. Fuss, K. L. Kompa, W. E. Schmid and S. Trušin 479 ^{13}C-Separation by a continuous discharge CO_2 laser Q-switched at 10 kHz

Roberto Marquardt and Martin Quack 485 Molecular motion under the influence of a coherent infrared-laser field

T. Elsaesser, R. J. Bäuerle and W. Kaiser 503 Picosecond infrared spectroscopy of molecules and semiconductors

Ph. G. Gottis and J. R. Lalanne 511 Contribution of near infrared laser techniques to the spectroscopic study of black liquids

P. Dietrich, M. Quack and G. Seyfang 517 Quantitative infrared photochemistry with CO_2 laser of different temporal shape: dissociation of CF_3I with nanosecond pulses

IVc. Spectroscopy of Fluids

Yu. N. Ponomarev 525 Multichannel optoacoustic spectroscopy of molecular gases with pulsed lasers

Katharina von Puttkamer, Martin Quack and Martin A. Suhm 535 Infrared spectrum and dynamics of the hydrogen bonded dimer $(HF)_2$

G. Moruzzi, M. Prevedelli, K. M. Evenson, D. A. Jennings, M. D. Vanek and M. Inguscio 541 Ultrahigh resolution far-infrared spectroscopy of methanol

Humio Inaba and Kinpui Chan 551 Development and performance of a new high-resolution spectrophotometer using InGaAsP and InGaAs light emitting diodes in the near IR

A. Amrein, H. Hollenstein, M. Quack and U. Schmitt 561 High resolution interferometric Fourier transform infrared spectroscopy in supersonic free jet expansions: N_2O, $CBrF_3$ and CF_3I

T. G. Adiks, G. V. Tchlenova and A. A. Vigasin 575 On the influence of van der Waals association on IR absorption band shapes of highly compressed carbon dioxide

G. Moruzzi, F. Strumia, P. Carnesecchi, R. M. Lees, I. Mukhopadhyay and J. W. C. Johns 583 Fourier spectrum of CH_3OH between 950 and 1100 cm^{-1}

IVd. Other Laser Applications

J. Arnesson, S. Gnepf, F. K. Kneubühl, D. Billeter, W. Neumann and W. Wölfli	607	Proposal for a particle accelerator driven by a far-infrared free-electron laser
Mi Zhengyu	631	Biological research by optically pumped far infrared lasers
D. C. Emmony	637	IR lasers in ophthalmology
E. Holzhauer	647	Detection of plasma waves with FIR lasers

V. SEMICONDUCTORS AND SOLID STATE

Va. Semiconductors

E. Otsuka	657	Quantum limit cyclotron resonance in semiconductors
P. Berdahl, V. Malyutenko and T. Morimoto	667	Negative luminescence of semiconductors
E. H. Haselhoff, R. J. M. Bonnie, G. J. Ernst and W. J. Witteman	673	Infrared short pulse measurements with tellurium
S. Marchetti, R. Simili, F. D'Amato and M. Giorgi	677	Thermoelectric and photon-drag signals in anisotropic thin semimetal films
V. M. Arutyunyan and S. G. Petrosyan	681	Avalanche multiplication in graded band gap structures
V. M. Arutyunyan, R. S. Barseghyan, G. E. Grigoryan, V. A. Mkhikyan and B. O. Semerdjian	685	Photoelectric properties of selenium doped p^+–n–n^+ silicon structure
V. M. Arutyunyan and A. T. Darbasyan	689	Photoresponse peculiarities of variable-gap P^+–N–N^+ diodes
V. K. Malyutenko, A. I. Liptuga, G. I. Teslenko and V. A. Botte	693	Thermal emission of semiconductors under non-equilibrium conditions
A. Medvid, M. Ogrinš, J. Šites and J. Litaunieks	701	Influence of free charge carrier distribution on optical properties of semiconductors
A. Medvid and V. Sotnikov	705	Thermogradient luminescence
I. I. Burshta, E. F. Venger and O. V. Snitko	709	Guided wave polaritons in the IR range in three-layered structures
A. K. Wan Abdullah, G. A. Gledhill, C. Patel and T. J. Parker	719	The far infrared optical constants of GaP
M. Závětová, J. Pastrňák and J. Oswald	725	Si related defects in GaAs

Vb. Solid State Spectroscopy

M. Balkanski	729	Infrared spectroscopy of solids
A. A. Volkov, G. V. Kozlov and A. M. Prokhorov	747	Progress in submillimeter spectroscopy of solid state
P. N. Bukivsky, Yu. P. Gnatenko, A. Kh. Rozhko and I. A. Farina	753	IR-Spectroscopy of crystals containing Jahn–Teller impurity centers
H. Greb and R. Geick	765	Magnetic resonance measurements on Rb_2MnCl_4
C. Julien, M. Massot, P. Dzwonkowski, J. Y. Emery and M. Balkanski	769	Infrared spectroscopy characterization of thin films used in solid state micro-batteries
M. Massot, C. Julien and M. Balkanski	775	Investigation of the boron–oxygen network in borate glasses by infrared spectroscopy

R. A. El-Mallawany 781 Theoretical and experimental IR spectra of binary rare earth tellurite glasses—1

M. M. Pradhan, R. K. Garg and M. Arora 787 FTIR spectroscopic study for improving material preparation of high Tc superconductors

K. F. Renk, W. Ose, T. Zetterer, J. Schützmann, H. Lengfellner, H. H. Otto, J. Keller, B. Roas, L. Schultz and G. Saemann-Ischenko 791 Far infrared reflectivity of $Tl_2Ba_2CaCu_2O_8$ and $YBa_2Cu_3O_7$ ceramics and of an oriented $YBa_2Cu_3O_7$ thin film

A. K. Wan Abdullah and T. J. Parker 799 High precision dispersive spectrometry for transmission studies in the far infrared

Vc. Photo-acoustics and Photo-thermal Effects

M. W. Sigrist, S. Bernegger and P. L. Meyer 805 Infrared-laser photoacoustic spectroscopy

S. A. Akhmanov, V. E. Gusev and A. A. Karabutov 815 Pulsed laser optoacoustics: achievements and perspective

D. Vergne and G. Busse 839 Remote inspection of coatings with thermal wave radiometry

M. Chirtoc and I. Chirtoc 847 A model for inverted spectral peaks in reflection mode photopyroelectric spectroscopy

Number 5

Stellan Jacobsson 853 Review. Optically pumped far infrared lasers

Erich N. Grossman 875 The coupling of submillimeter corner-cube antennas to Gaussian beams

A. Rogalski and J. Rutkowski 887 The performance of $Hg_{1-x}Mn_xTe$ photodiodes

Shankar Ram and Kanik Ram 895 IR investigation of amorphous $BaO–Fe_2O_3–B_2O_3$ glasses prepared using 1 mol% TiO_2

E. Placzek-Popko, E. Dudziak, L. Jedral, J. F. Kasprzak and J. M. Pawlikowski 903 Electrical properties of HgCdMnTe *p–n* junctions

S. P. Braim, A. Foord and M. W. Thomas 907 System implementation of a serial array of SPRITE infrared detectors

N. M. Haegel and A. M. White 915 Modeling of near-contact field and carrier distributions in extrinsic germanium photoconductors

Number 6

Fritz K. Kneubühl 925 Review on the theory of the dielectric dispersion of insulators

R. Risaliti, L. Ronchi and A. Scordino 943 Interaction of electrons with the evanescent field in a free-electron device

M. F. Campbell, L. Haser and S. Drapatz 947 Fabry–Perot etalons as prefilters for astronomical far-infrared Fourier transform spectroscopy

C. D. Maxey, P. Capper, B. C. Easton and P. A. C. Whiffin 961 Band edge absorption in $Cd_xHg_{1-x}Te$ grown by metal–organic vapour phase epitaxy

R. Behrendt, K. H. Herrmann and K.-P. Moellmann 965 The product r_0A versus cut-off wavelength for PbSnTe and HgCdTe photodiodes. Consequences for the optimum temperature resolution of a radiometric system

Y. Hait and Y. Nemirovsky	971	Comparison of NETD performance of staring and partial-scanning infrared focal plane arrays
Mukesh Jain	985	Laser induced recrystallization in lead mercury chalcogenide semiconductor films
S. Mattei, P. Masclet and P. Herve	991	Study of complex refractive indices of gold and copper using emissivity measurements
P. B. Whibberley and J. R. Birch	995	The temperature variation of the near-mm wavelength optical constants of Fluorosint
P. J. Chandley and M. B. Dolan	997	Using the Kramers–Kronig dispersion relations to find the optical constants of liquids in the IR; digol
P. de Bernardis, S. Masi, M. Perciballi and G. Romeo	1005	A resonance wobbling secondary mirror for balloon-borne IR telescopes
D. V. Plant and N. M. Lawandy	1013	Pressure broadening of the ground vibrational state $J = 31 \rightarrow J = 32$ transition of CH_3F by coincidence laser spectroscopy
X. Gerbaux and A. Kitade	1021	A far infrared interferometer using a rotating polariser
